Number of K-12 Students: 5,456

Number of K-12 Distance Education Programs: 2  
Number of K-12 Distance Education Students: 588

## **Governance and Regulation**

The *Education Act, 2002* allows the Minister of Education to provide distance education courses and charge fees for students to access those courses. Distance education is defined as a program of study or course taken by a student where the content and resources are sent to the student to work through independently of a school.

While Yukon Education is supportive of territorial-based online and blended learning programs, the Department is still engaged in several memorandums of understanding with distance learning providers in other jurisdictions. In these instances, these memorandums provide an additional layer of regulation for schools to follow.

For the most part, distance education is funded in the same manner as brick-and-mortar education. However, parents may be eligible for reimbursement of essential school resources related to distance education and/or online learning as determined by the Deputy Minister.

## **K-12 Distance and Online Learning Activity**

Aurora Virtual School is the only online school in the territory. As a public school, it reports all aspects directly to the Department of Education the same as any traditional school. During the 2018-19 school year, Aurora Virtual School enrolled 98 students in one or more of the 51 online courses it offered.

In addition, the Yukon still accesses programming from four distance learning schools in British Columbia, as well as the *Centre francophone d'éducation à distance* (CFED) in Alberta, for either in single courses or for full-time studies. During the 2018-19 school year, these four schools delivered courses to 55 students. Additionally, there were 17 students enrolled in programming offered by CFED (i.e., 8 contractual students and 9 teaching support).

## **K-12 Blended Learning Activity**

Yukon Education defines blended learning as a formal education program in which a student learns in part through digitally managed content, instruction and feedback and in part through face-to-face group activities at a supervised physical location away from home and with some element(s) of student control over time, place, path and/or pace.

The Department funds a learning management system (i.e., *Moodle*) and digital content, which is made available to each of the territory's schools. The Department also funds a portion of a Curriculum Technology Consultant whose responsibilities are dedicated to supporting blended learning and the provision of various hardware, software, and other supports.

Yukon Education uses the data from the *Moodle* learning management system to formally track the number of students who are enrolled in at least one blended learning course. During the 2018-19 school year there were 418 students from 18 of the territory's 30 schools involved in K-12 blended learning. This figure represents 13% of Yukon's grade 5-12 student population.
